

# BUILDING A QUIZ APPLICATION USING SPRING BOOT

spring initializr				
Project O Gradle - Groovy O Gradle - Kotlin	Languag  Java  Maven  Groovy	O Kotlin		
Spring Boot O 3.3.0 (SNAPSHOT) O 3.1.8 (SNAPSHOT)	O 3.2.2 (SNAPSHOT) O 3.1.7	■ 3.2.1		

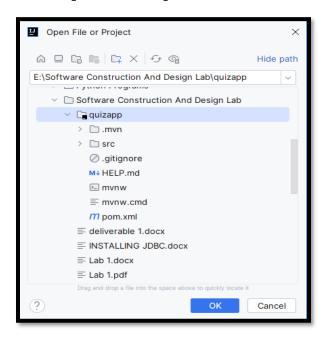

Project Metadata			
Group	com.telusko		
Artifact	quizapp		
Name	quizapp		
Description	Telusko Quiz App		
Package name	com.telusko.quizapp		
Packaging	Jar O War		
Java	O 21		

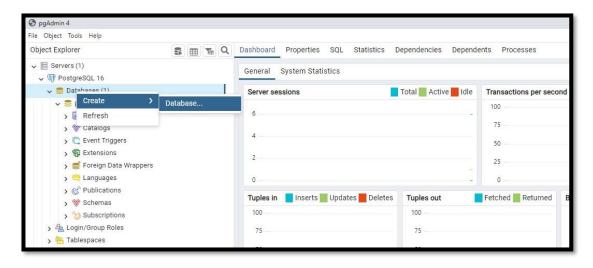

Then we will click on generate and it will create a project and then we have to unzip the project:

#### Create a REST controller to handle requests for all questions:

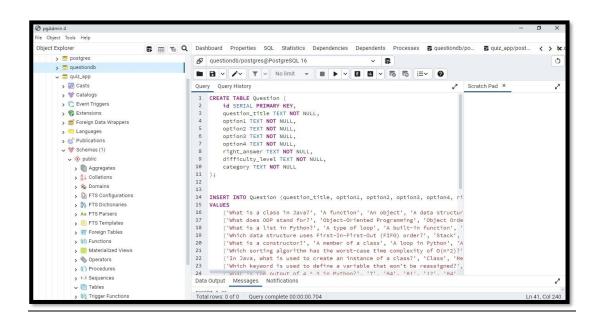

• CREATE A NEW DATABASE IN PG ADMIN 4:

```
1
    -- Database: questiondb
 2
    -- DROP DATABASE IF EXISTS questiondb;
 3
4
5
    CREATE DATABASE questiondb
 6
        WITH
 7
        OWNER = postgres
8
        ENCODING = 'UTF8'
9
        LC_COLLATE = 'English_United States.1252'
10
        LC_CTYPE = 'English_United States.1252'
        LOCALE_PROVIDER = 'libc'
11
12
        TABLESPACE = pg_default
13
        CONNECTION LIMIT = -1
14
        IS_TEMPLATE = False;
```

## • CREATING TABLES AND INSERTING:

```
Data Output Messages Notifications

CREATE TABLE

Query returned successfully in 866 msec.
```

## • SHOW DATA:

```
Query Query History

1 SELECT * FROM public.question
2 ORDER BY id ASC
```

Data	Data Output Messages Notifications					
	id [PK] integer	question_title text	option1 text	option2 text		
1	1	What is a class in Java?	A function	An object		
2	2	What does OOP stand for?	Object-Oriented Programming	Object Ordering Process		
3	3	What is a list in Python?	A type of loop	A built-in function		
4	4	Which data structure uses First-In-First-Out (FIFO) order?	Stack	Queue		
5	5	What is a constructor?	A member of a class	A loop in Python		
6	6	Which sorting algorithm has the worst-case time complexity of $O(n^2)$ ?	Merge Sort	Quick Sort		
7	7	In Java, what is used to create an instance of a class?	Class	Method		
8	8	Which keyword is used to define a variable that won't be reassigned?	static	final		
9	9	What is the output of 4 ^ 3 in Python?	7	64		
10	10	What does the term "polymorphism" refer to in programming?	Using multiple inheritance	Ability to take multiple forms		
11	11	What is the purpose of the 'self' parameter in Python class methods?	It refers to the current instance of the class	It is used to call parent class methods		
12	12	Which of the following is not a primitive data type in Java?	int	boolean		
13	13	What is the time complexity of a binary search?	O(n)	O(log n)		

## • **CONNECTION WITH DATABASE:**

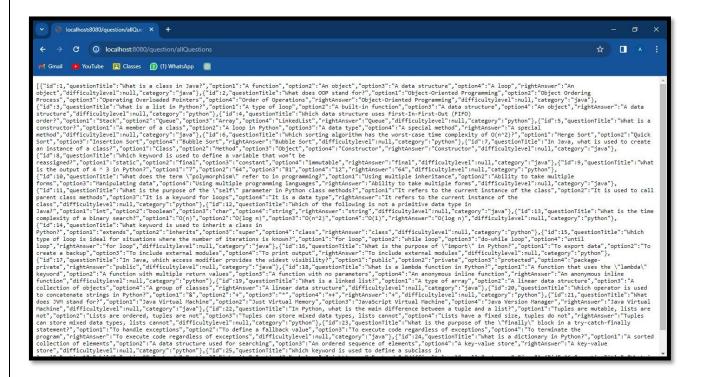

```
spring.datasource.driver-class-name=org.postgresql.Driver
spring.datasource.url=jdbc:postgresql://localhost:5432/questiondb
spring.datasource.username=postgres
spring.datasource.password=bisma
spring.jpa.hibernate.ddl-auto=update
spring.jpa.properties.hibernate.dialect=org.hibernate.dialect.PostgreSQLDialect
spring.jpa.show-sql=true
```

## • CREATING QUIZ APP APPLICATION:

## • GET ALL QUESTIONS:

```
© QuestionService.java × ① QuestionDao.java
                                               © Quiz.java
13
     @Service
14
     public class QuestionService {
         4 usages
         @Autowired
          QuestionDao questionDao;
16
17
         1 usage
          public ResponseEntity<List<Question>> getAllQuestions() {
18
19
              try {
                  return new ResponseEntity<>(questionDao.findAll(), HttpStatus.OK);
21
              } catch (Exception e) {
23
                  e.printStackTrace();
              }
24
              return new ResponseEntity<>(new ArrayList<>(), HttpStatus.BAD_REQUEST);
25
```

```
@Service
13
     public class QuestionService {
14
         4 usages
         @Autowired
15
         QuestionDao questionDao;
16
17
         1 usage
         public ResponseEntity<List<Question>> getAllQuestions() {
18
19
                 return new ResponseEntity<>(questionDao.findAll(), HttpStatus.OK);
21
             } catch (Exception e) {
22
23
                 e.printStackTrace();
24
             return new ResponseEntity<>(new ArrayList<>(), HttpStatus.BAD_REQUEST);
26
```

#### • GET QUESTIONS BY CATEGORY:

```
no usages

@GetMapping("category/{category}")

public ResponseEntity<List<Question>> getQuestionsByCategory(@PathVariable String category)

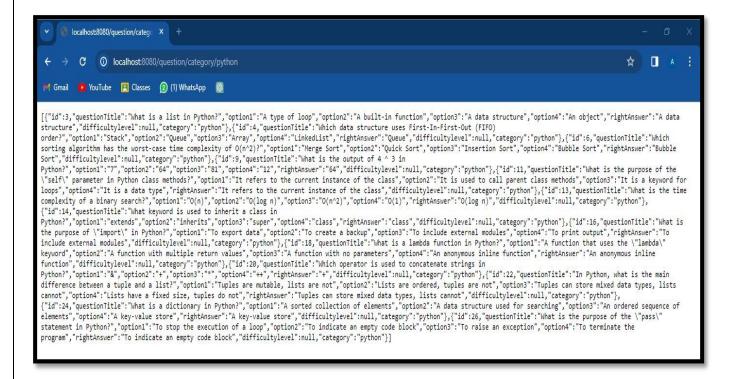

{

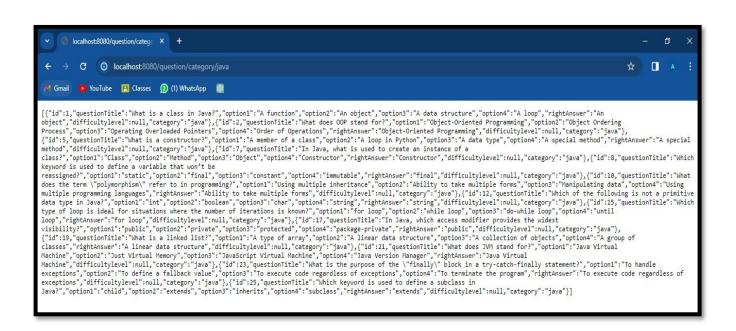

return questionService.getQuestionsByCategory(category);
}
```

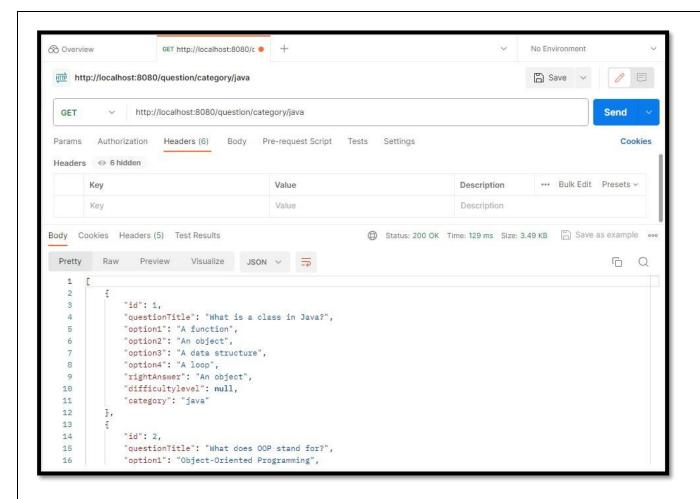

```
© QuestionService.java × ① QuestionDao.java © Quiz.java

1 usage
public ResponseEntity<List<Question>> getQuestionsByCategory(String category) {
    try {
        return new ResponseEntity<>( questionDao.findByCategory(category), HttpStatus.OK);
    }

    catch (Exception e) {
        e.printStackTrace();
    }
    return new ResponseEntity<>(new ArrayList<>(), HttpStatus.BAD_REQUEST);
}
```

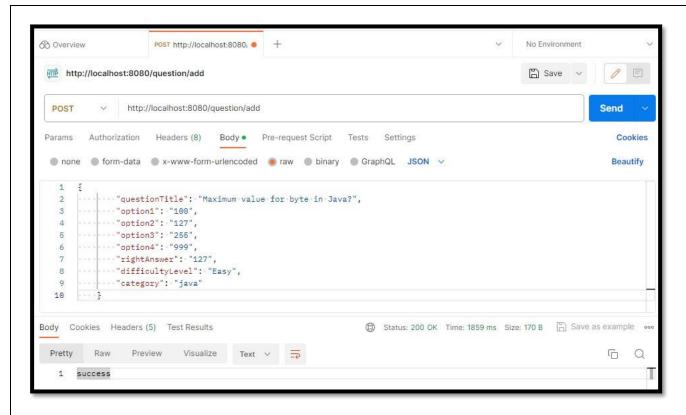

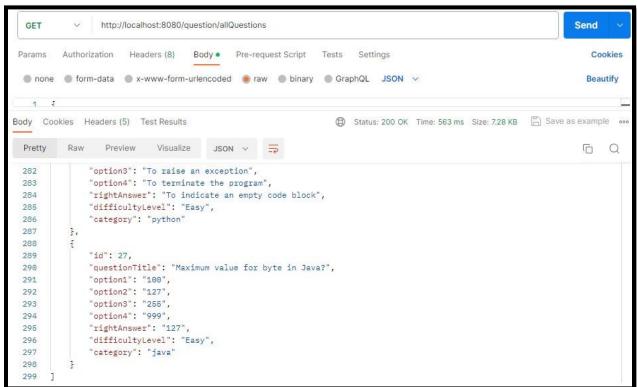

## • ADDING QUESTION IN DATABASE:

```
@PostMapping("add")
public ResponseEntity<String> addQuestion(@RequestBody Question question)

{
    return questionService.addQuestion(question);
}
```

```
1 usage
public ResponseEntity<String> addQuestion(Question question) {
   questionDao.save(question);
   return new ResponseEntity<>( body: "success", HttpStatus.CREATED);
}
```

Question is saved successfully.

#### • DELETE QUESTION:

```
no usages

@DeleteMapping("delete")

public String deleteQuestion(@RequestBody Question question) { return questionService.deleteQuestion(question); }

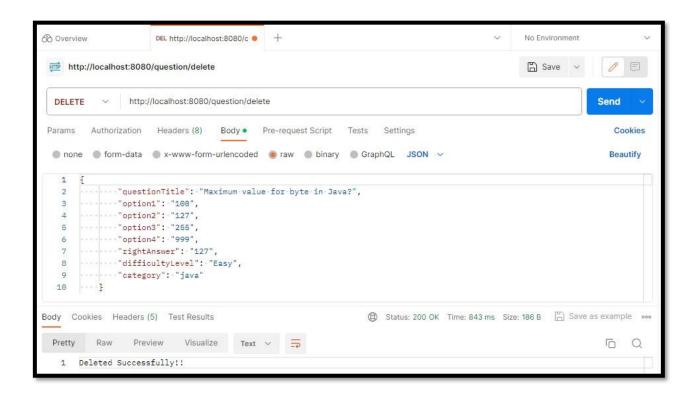

}

40
```

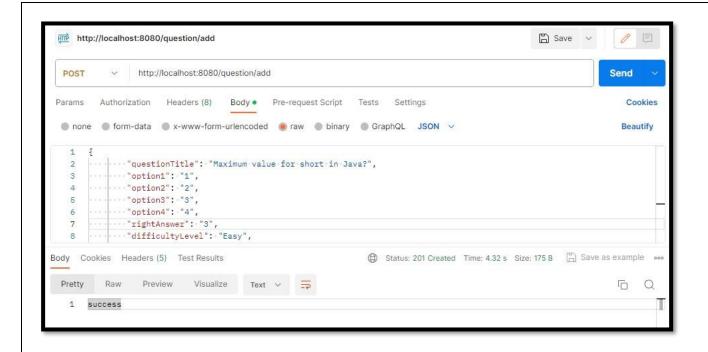

```
1 usage

public String deleteQuestion(Question question) {
 questionDao.delete(question);
 return "Deleted Successfully!!";
 }

46 }
```

#### • RESPONSE ENTITY:
